TikZ Année 2013-2014

EXEMPLES DE GRAPHIQUES AVEC TIKZ

Exercice 1:

Avec Pstricks: version Philippe année 2007

$$k \times (a + b) = k \times a + k \times b$$

Voici la formule de la distributivité : $(a + b) = k \times a + k \times b$ vue en 5°.

$$(a+b)\times(c+d) = a\times c + a\times d + b\times c + b\times d$$

Voici la formule de la distributivité : $(a + b) \times (c + d) = a \times c + a \times d + b \times c + b \times d$ vue en 4°.

Avec Tikz: version Dominique

$$\overrightarrow{a \times (b+c)} = \overrightarrow{a \times b} + \overrightarrow{a \times c}$$

$$(a+b) \times (c+d) = a \times c + a \times d + b \times c + b \times d$$

Au milieu d'un texte:

Voici la formule de la simple distributivité : $a \times (b+c) = a \times b + a \times c$ (vue en 5^{ème}).

Voici la formule de la double distributivité : $(a+b) \times (c+d) = a \times c + a \times d + b \times c + b \times d$ (vue en $4^{\text{ème}}$).

Avec Tikz: version améliorée

$$\mathbf{a} \times (\mathbf{b} + \mathbf{c}) = \mathbf{a} \times \mathbf{b} + \mathbf{a} \times \mathbf{c}$$

$$(a+b)\times(c+d) = a\times c + a\times d + b\times c + b\times d$$

Au milieu d'un texte:

Voici la formule de la simple distributivité : $a \times (b + c) = a \times b + a \times c$ (vue en 5ème).

Voici la formule de la double distributivité : $(a + b) \times (c + d) = a \times c + a \times d + b \times c + b \times d$ (vue en 4ème).

... une parabole 🕒 ...une hyperbole 🖪

...d'un autre type 🖪

$$f(x) = 5$$

$$f(x) = 3$$

$$g(x) = x + 4$$

$$h(x) = \frac{1}{3}x + \frac{1}{2}$$

$$k(x) = x^2$$

$$k(x) = x^2$$

$$l(x) = \frac{1}{x}$$

$$m(x) = \sqrt{x}$$

🔁 ... une fonction affine

🖅 ...la fonction carré

...la fonction inverse

... une autre fonction
